

Medication for complex conditions

Our relationships with more than 150 pharmaceutical manufacturers help us provide superior access to specialty medications, including limited-distribution drugs, at competitive costs.

Uniquely positioned to address your challenges

Complex conditions require specialized care. Our experts, facilities and resources can help you improve health outcomes while reducing the cost of care. We evaluate patients on a case-by-case basis. If a medication is on the list, we can dispense the medications, but it might not be covered by the patient's plan. Please check benefit coverage.

Limited-distribution drugs for a range of complex conditions
